The next total solar eclipse in Iceland will occur during the evening of Wednesday, August 12, 2026. Time and Date forecasts that the partial eclipse in Iceland will start at approximately 4:42pm, with totality (blackout) beginning at around 5:43pm.. Different Icelandic regions will experience totality at slightly different times within this window, and the duration of totality will also vary.

Iceland has long been known as an ideal location for many energy-intensive companies, thanks to its affordable and abundant power springing from its natural geothermal and hydro sources and Landsvirkjun, the National Power Company of Iceland. One Silicon Valley startup has taken notice, and recently announced plans to build a silicon solar factory in Iceland.
