

Can solar power improve Indonesia's energy security?

Indonesia Solar Energy Outlook 2025 highlights the crucial role of solar power in improving Indonesia's energy security. The report analyzes how solar PV can help reduce dependence on fossil energy, improve the reliability of electricity supply, and address the challenges of climate change.

What is Indonesia's solar energy capacity?

The capacity of solar energy in Indonesia is steadily climbing. With total capacity reaching over 322.6 MW as of the first half of 2023, this is an increase of over 800% in the last 10 years. This progress is part of Indonesia's solar energy plan, which targets 5 GW of installed capacity by 2030.

What is Indonesia's solar energy plan?

This progress is part of Indonesia's solar energy plan, which targets 5 GW of installed capacity by 2030. The growth of solar power in Indonesia reflects not just a commitment to shift away from its fossil fuel-dominated energy system but also recognises the immense potential the solar energy holds in the Indonesian archipelago.

Will Indonesia add more solar power by 2033?

According to IESR, Indonesia's state electricity company, PLN, plans to increase renewable energy generation by adding 7.9 GW of solar capacity by 2033. Additionally, policy changes from the Ministry of Energy and Mineral Resources are expected to add over 5 GW of rooftop solar capacity within five years.

Should Indonesia strengthen the supply chain of solar power plants?

In Southeast Asia, solar energy capacity is recorded at 25.9 GW. The Institute for Essential Services Reform (IESR) suggests that Indonesia strengthen the supply chain of the solar power plant industry to increase its international competitiveness, support the adoption of solar power plants, and create jobs that can spur economic growth.

Can Indonesia harness solar energy?

While solar energy capacity is increasing in Indonesia, the current installed capacity is just a fraction of the potential capacity of solar power development. As a nation that straddles the equator, it gets direct, high-intensity solar irradiance, putting it in an ideal position to harness solar energy.

The Institute for Essential Services Reform (IESR) suggests that Indonesia strengthen the supply chain of the solar power plant industry to increase its international competitiveness, support the adoption of solar power ...
