Why should you choose Insensys Ltd?

Insensys Ltd are committed to maintaining our position at the forefront of sensing technology by continually developing systems that deliver improved performance and reliability at reduced cost to our customers. Insensys Ltd are dedicated to continuous improvement and strive to anticipate, meet and exceed our customers' expectations.

How long do Insensys systems last?

Insensys solid state (no moving parts) sensing systems are designed for 25 years' operation in a turbine with minimal maintenance in wet,hot,cold or vibrating environments. We have built over 7,000 systems,primarily for the Wind Turbine market,to measure blade bending. All are still in operation today.

Who are LM & Insensys?

LM has worked with Insensys for many years - together we registered the first patents for embedding FBGs within resin injection moulded blades. It was a complex project and we had to learn a lot about fibre behaviour within the blade structure as the resin cures.

What makes Insensys a great company?

Insensys are proud to be at the forefront of employee development and opportunity. Our success is down to individuals with the ability and desire to think outside the box. Individuals who strive to make the impossible possible. Individuals with the skills and determination to achieve remarkable results.
