

What is Iran's new energy plan?

Diversifying energy resources is a key pillar of Iran's new plan. In addition to solar and hydropower, biomass from the municipal waste from large cities and other agricultural products, including fruits, can be used to generate energy and renewable sources.

How can Iran achieve long-term electricity targets?

We can conclude that Iran's electricity capacity is high and this can help to increase the share of wind energy in the total primary supply of energy. To achieve long-term electricity targets, it is necessary to provide incentives to private investors and to put in place clear and stable policies.

Why is solar energy important in Iran?

In high-rainfall and mountainous regions of Iran, large rivers' adequate water levels promote the development of hydropower plants. Moreover, the high share of desert and arid areas, which provides more than 300 sunny days per year, makes solar energy a suitable option as an important source of renewable energy.

What are Iran's Energy Priorities?

For example, based on various indicators, Manzoor and Rahimi showed that Iran's priorities for construction and investment in electricity generation and power plants in the future include, in order, wind energy, hydropower, photovoltaic energy, combined-cycle power plants, nuclear power plants and thermal power plants. 4.

Can Iran's future be planned based on recognized and predictable electricity costs?

The future of Iran's economy can be planned based on recognized and predictable electricity costs because that electricity comes from indigenous energy and is free from all the security, political, economic and environmental problems associated with oil and gas.

How can Iran improve the energy system?

We can conclude that Iran has a significant potential capacity for crude oil and natural gas reserves, its transport and storage. It can increase the weak flexibility of the energy system by constructing more transition lines and braking swap with its neighbors.

PSCR-P-BESA Reports No 24 (December 31, 2023) As of January 1, Armenia assumes the chairmanship of the Eurasian Economic Union (EAEU), succeeding Russia. Speaking at the meeting of the Eurasian Economic Council in St. Petersburg, Prime Minister Nikol Pashinyan emphasized the economic nature of the EAEU and stated that Armenia's ...

Israeli history must be retold as a sequence of three long historical wars. The Iron Swords War does not stand on its own. The campaign in Gaza is a critical transition stage, both conceptual and practical, during which ...

PSCR-P-BESA Reports No 72 (July 25, 2024) There is a well-known observation that foreign policy is a continuation of domestic policy. However, it is often the other way around, and in general this division is unnecessary. The example of Iran today proves this.

2 ???&#0183; The Department of State is today imposing sanctions on four entities that have transported Iranian oil and identifying six vessels as their blocked property. The United States ...

Mideast Security and Policy Studies Paper #182. EXECUTIVE SUMMARY: This paper presents a new perspective on the reasons for the outbreak of the Second Lebanon War against Hezbollah in 2006. Incidents of warming on Israel's border with Lebanon vis-[#224](#);-vis Hezbollah occasionally raise the question of whether Iran is also in the picture.

In response to the October 7 Hamas attacks on Israel, the United States has deployed significant naval forces to the Eastern Mediterranean and the Arabian Sea. This strategic display of sea power aims to deter regional escalation and address unexpected challenges, such as the Yemeni Houthi pirate and missile offensive in the Red Sea. The US ...

The attack on the Saudi oilfields took the security establishments of both the kingdom and the US completely by surprise. The strike led to a 50% drop in Saudi oil production, which in turn prompted a surge in oil prices in the global market. The attack was a daring and aggressive leap forward on Iran's part, and it has serious regional and geopolitical implications.

Iran continues to insist that its nuclear program is designed for peaceful purposes despite all evidence of its military nature. This evidence includes the IAEA's recent findings regarding Tehran's progress in the field of ...

This analysis argues that Iran is steadily making progress towards a nuclear weapon and is doing so via North Korea. Iran is unwilling to submit to a years-long freeze of its military nuclear program as stipulated by the July 2015 Vienna Nuclear Deal. North Korea is ready and able to provide a clandestine means of circumventing the deal, which would allow the ...
