

Iris Power, founded in 1990, offers sensors, monitors and diagnostic solutions for the assessment of the actual state of generators, motors, dry-type transformers and air-insulated switchgear, so that the risk assessed and the necessary maintenance can be planned. In 2010 Iris Power LP was acquired by Qualitrol Corporation, a global leader for ...

Iris Power, founded in 1990, offers sensors, monitors and diagnostic solutions for the assessment of the actual state of generators, motors, dry-type transformers and air-insulated switchgear, so that the risk assessed and the necessary ...

Simultaneous monitoring of up to 25 channels from Iris Power EVAII fiber optic accelerometers to provide detailed analysis of acceleration, velocity, and displacement for each channel. Automated alerts and alarm outputs based on ...

Iris Flowers in Greek Mythology: In Greek mythology, Iris was the goddess of the rainbow and a messenger for the gods, serving as a link between heaven and humanity. The flower was named after her because of its many colors. Irises were planted on graves to summon the goddess to guide the souls of the deceased to their afterlife journey, symbolizing a ...

Iris Power EVAII sensor kits are non-metallic fiber optic accelerometers used to measure, analyze and trend vibration of the generator stator endwindings. The sensors are able to simultaneously measure vibration in the radial and tangential directions safely in high voltage and magnetic fields found in air-cooled as well as hydrogen cooled ...
