

Can the Isle of Man rely on gas and oil?

It's clear that like all leading economies the Isle of Man cannot rely on gas and oil indefinitely. While the island's target to achieve net-zero by 2050 may seem far away, most of us worry about the current price of energy. Graph showing options to generate renewable power, store energy and utilise power on the Isle of Man.

How can the Isle of Man Government help you?

Save money, reduce emissions and become more energy efficient! If you are looking to reduce your household bills and/or create a more energy efficient home the Isle of Man Government offer advice, support and incentives that could help. Our homes are the largest carbon emissions contributor in the Isle of Man.

Where does the Isle of Man get its electricity?

Most of the Isle of Man's electricity is generated at a gas-fired power station in Douglas. Manx Utilities (MU) has announced that electricity prices on the island are to rise by 30%. The increase will be applied in two increments of 15%, one in April and then one in July.

Does the Isle of Man import energy from the UK?

The Isle of Man currently imports all of its energy from the UK (with the exception of what is produced from Sulby). In all future models, the Isle of Man remains dependent on GB for the provision of baseload. This is the case even where capacity is increased by building excess renewables, as the stabilisation is still provided by interconnectors.

How much does a household earn on the Isle of Man?

a) Your weekly income and the weekly income of every household member is below the Isle of Man median income, defined by the most recent Isle of Man Earnings Report. This is £163,673 per week, which equates to £34,996 a year, or b) The combined income of your household does not exceed £60,000 per year.
