Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

Ideally tilt fixed solar panels 45°; South in Douglas, Isle Of Man. To maximize your solar PV system's energy output in Douglas, Isle Of Man (Lat/Long 54.1475, -4.4825) throughout the year, you should tilt your panels at an angle of 45°; South for fixed panel installations.

6 ???; The solar day over the course of the year 2024. From bottom to top, the black lines are the previous solar midnight, sunrise, solar noon, sunset, and the next solar midnight. The day, twilights (civil, nautical, and astronomical), and night are indicated by ...

The Green Living Grant Scheme has been created to assist Island residents with the reduction of carbon emissions and household energy bills, and provides a financial contribution of up to a maximum of £5,725 per property, to help make residential properties more energy efficient.

Douglas council is to start producing its own sustainable solar energy. The local authority has approved funding for a solar farm to power some of its facilities. The generation facility would be built in Braddan and have a life span of around 20 years. It's thought the savings will mean it'll effectively pay for itself within five to seven years.

"The solar farm would generate enough power to meet more than 7% of the Isle of Man's current electricity demand and support the Government's aim for electricity on the Island to be 100% green by 2030." The project represents an investment of around £30m across the 40-year anticipated life of the project, with

no public investment.
