

How much solar power does Ivory Coast have?

Coulibaly said the Ivory Coast's installed solar capacity currently stands at 2,907 MW. The country is now working toward deployment targets of 3,500 MW in 2025, 5,200 MW by 2030 and 8,600 by 2040. Ivory Coast's first solar power plant, located in the northern town of Boundiali, was commissioned in 2022.

When will Ivory Coast's solar power plants be built?

The minister said that contracts are currently under review for the construction of other solar power plants, with a cumulative capacity of 600 MW. Commissioning of these projects will take place in 2025 and 2026. Coulibaly said the Ivory Coast's installed solar capacity currently stands at 2,907 MW.

Is Cie launching a solar farm in the Ivory Coast?

CIE, the Ivory Coast's state-owned utility and subsidiary of French group Eranove, has recently completed the development of this solar farm in the Boundiali Department, Bangoue Region. The solar power plant is now set to supply clean electricity to 30,000 households in the region. But, its launch date is yet to be known.

How much money did Germany spend on the Ivory Coast project?

Germany's Development Bank KfW financed the EUR40 million project with EUR27 million through the German Federal Ministry for Economic Cooperation and Development. The European Union added EUR9.7 million, and the government of Ivory Coast contributed the remaining sum.

Will Côte d'Ivoire launch its first solar plant?

But, its launch date is yet to be known. Noumory Sidibé, the Director General of CIE said that Côte d'Ivoire is rich in renewable energy potential, and after having experimented with fossil fuels and hydroelectricity, the country is about to commission its first solar plant.

How is the Ivorian solar project financed?

The solar project is financed by a concessional loan of EUR27 million from the German development bank KfW and a grant of EUR9.7 million from the European Union (EU). The Ivorian state contributed the remaining sum to reach the necessary financing.
