Jamaican Dr. Gary Jackson has been appointed executive director to the Caribbean Center for Renewable Energy and Energy Efficiency (CCREEE). Dr. Jackson has a Ph.D. in Mechanical Engineering and an MSc in Project Management. Both of these degrees are from the University of Birmingham in the United Kingdom. He has also pursued studies under a [...]

Turning Green Lights On. Sun, wind, water and biofuels: renewable energies are not only environmental-friendly, they can also boost the economy in developing countries by optimizing and saving on industrial production, improving business activities, social welfare and every day's life in rural areas - all of this while saving the planet!

Title: Call for Proposals (CfP) for the selection of Grant Beneficiary for the implementation of A2D Facility Pilot Demonstration Projects Beneficiary Country : Countries that are eligible to receive Official Development Assistance (ODA) - please see the

Producción. En 2020, Jamaica generó 4767 GWh de electricidad. Los combustibles fósiles fueron la principal fuente de energía (88,67 %) y la complementaban, en menores cantidades, la energía eólica (5,87 %), la hidroeléctrica (2,85 %) y la solar (2,60 %). Se pierde más de una cuarta parte (26,5 %) de la producción eléctrica de Jamaica debido a la mala infraestructura de transmisión ...

The United Nations Industrial Development Organization (UNIDO) and the Austrian Development Agency (ADA), the operational unit of Austrian Development Cooperation, today signed a 1.3 million Euro funding

agreement for the establishment of the Caribbean Centre for Renewable Energy and Energy Efficiency (CCREEE).

SHARM EL-SHEIKH, 8 November 2022 - Francesco La Camera, Director General of the International Renewable Energy Agency (IRENA), and Gerd Müller, Director General of the United Nations Industrial Development Organization (UNIDO), have signed a joint declaration on advancing sustainable energy through the fundamental role of green hydrogen.

Jamaica stands out as one of New Fortress' most mature markets. The company's Jamaican assets include an LNG supply operation that serves 25 customers through long-term agreements extending for two decades, as well as a power plant at the Jamalco complex in Clarendon, a floating natural gas vessel offshore Old Harbour, St Catherine, and a ...

5 ???#0183; That UNIDO experts' experience kept my focus on those renewables developments especially in Luzon and Mindanao; I wore a PhilEc hardhat for weeks. There, under the "Retail Competition and Open Access" (RCOA) framework, electricity to the over 2,000 inhabited islands in Mindanao, The Visayas, and Luzon, respectively, power is delivered ...

2 ???#0183; Through the project, SunTerra is to sell up to 130GWh of energy or about 4 per cent of Jamaica's total energy requirements annually to JPS under a 20-year power purchase agreement.

In order to assure that SMEs can successfully engage in their productive activities, UNIDO focuses on promoting efficient patterns of energy use through renewable energy, such as fuel-switching from fossil fuels to locally available ...

Costa Rica has produced over 98% of its electricity in the last years using renewable energy sources. The abundance of renewable energy creates a massive opportunity for green hydrogen production. Pilot projects and studies developed in the country show the technical feasibility of generating green hydrogen from water electrolysis using ...

Nuclear energy is not new to Jamaica. The country's first nuclear research reactor, SLOWPOKE-2, a pool type reactor designed by Atomic Energy of Canada, was installed at The University of the West Indies (UWI) Mona campus back in 1984 and has been used in research in several areas. It is the Caribbean's first and only nuclear reactor.

THE National Water Commission (NWC) is in the final stages of the licensing process for the sale of energy from the Mona Reservoir Floating Solar Project to the Jamaica Public Service (JPS).
