

Could a solar farm boost Jersey's energy security?

Bosses said the plans for the 2.7 hectare site, meant electricity would be returned to the grid in a process which would "increase Jersey's energy security". A solar farm in Jersey could power 17% of the parish's homes if planning is approved, electricity bosses say.

Are there plans to build a solar farm in Jersey?

Concerns have been raised over plans to build six solar farms across Jersey. The first site is nearing completion at St Clement and two other sites have passed the planning stage, with building work expected to begin in early 2025.

Does Jersey electricity want to protect green space?

Steve Tanner, head of capital delivery for Jersey Electricity (JE), said the company wanted to "protect green space on the island" and "the total of all six sites is only 0.8% of the total agricultural land available". Ms Layzell said: "These fields in St Mary are in the top 50% of land for Jersey Royals.

Will Jersey's 'island plan' boost energy security?

Bosses said the plans for the 2.7 hectare site, meant electricity would be returned to the grid in a process which would "increase Jersey's energy security". The firm said the proposal - which is one of several sites it hopes to build by 2026 - supported the government's Island Plan and energy policy.

Could a solar farm power 17% of St Peter's homes?

A solar farm in Jersey could power 17% of the parish's homes if planning is approved, electricity bosses say. Jersey Electricity (JE) is inviting St Peter parishioners to attend a consultation for a ground-based solar installation at Mont Fondon.

Will a ground-based solar installation at Mont Fondon increase Jersey's energy security?

Jersey Electricity (JE) is inviting St Peter parishioners to attend a consultation for a ground-based solar installation at Mont Fondon. Bosses said the plans for the 2.7 hectare site, meant electricity would be returned to the grid in a process which would "increase Jersey's energy security".

July 2013 Solar PV Emergency & Resilience Planning Key Messages Solar PV systems can play an important role in the risk management, response and recovery of natural disasters. Solar PV systems can be applied for various uses in emergency operations, such as backup power for shelters, communications, lighting, transportation,

Solar batteries help you get the most out of your solar energy system. The benefits include: Self-sufficiency - The more power you produce and store yourself, the less you have to rely on your utility company. This is becoming especially important as NJ utility companies transition to time-of-use rate models, which increase rates when demand for electricity is highest (typically in the ...

In a corner of St Clement near the Grouville border, hidden away down a narrow lane, a fascinating renewable energy project is taking shape: Jersey's first large-scale, ground-mounted solar array. On completion - hopefully by the end of the year - the Jersey Electricity array will produce over 4MW of electricity a year, enough to...

The 90 MW solar goal was achieved in Energy Year 2009. At that time, New Jersey's solar program was second in the country and among the top ten solar programs in the world. Mike said, "When we started the program there were nine kW of solar installed in six facilities that year. Now, New Jersey installs nine kW of solar every ten minutes."

The setup process took annoyingly long, like 5 months, but once that was done it's been seamless. I just got billed for the November 2023 solar portion (auto billed from my credit card). You'll get a regular monthly bill from PSEG with your solar allocation subtracted from your total. Hartz bills you a few months later for the solar portion.

Latest Award will Provide Solar Power and Energy Savings to Low-Income Households While Advancing
