

The EcoFlow stuff is a very expensive way to run a lithium battery bank and a pure sine wave inverter. I know my Starlink with Cisco switch (2960-x) ran for about 30 mins on an APC 900va ups the other day. maybe like 120-150W max consumption. The bigger Ecoflow type things should power it for quite a long while.

Now, I looked at the Starlink travel cases and just couldn't make sense of the cost. I already use stackable storage totes in our RV (converted cargo trailer I use for work, 1,600w of solar, 48v battery system etc, which can be another 120v/48v input as a 48v lithium battery runs very close to the 57v the Gen3 Starlink runs on so we can go straight to battery or ...

STARLINK comes with everything needed to get online including a kickstand, gen 3-router, cables and power supply; STARLINK standard kit comes with a gen 3 router which boasts 2-ethernet ports, wi-fi-6, a range of up to 297m2 and the ability to connect up to 235 devices

You just need a beefy solar panel which will provide enough power, a couple car batteries (deep cycle gel batteries work the best), a solar charge controller and a good inverter and you're set.

A Reddit for Solar Power enthusiasts, the latest news on Solar Technology, and "How to"; Advice for Solar Energy Production. Members Online. Can use this small UPS to buffer this solar panel? I only what to power up a modem and a router ... \$1.6 Million dollar invoice for a Starlink Kit ...

The announcement of the solar-powered Starlink kits is particularly exciting as it promises to expand internet access to some of the world's most remote locations.
