

Is battery energy storage possible in Jordan?

In response to this, Fichtner in collaboration with the Jordanian Ministry of Energy and the transmission system operator, NEPCO, has analyzed the potential for battery energy storage and, in the role of Transaction Advisor, is providing support for implementing a pilot project.

How to reduce energy consumption in Jordan?

Another scenario has been made to decrease the energy from the generation side and store the energy by replacing the diesel generators on the generation side and replace it with 698 GWh PV panels and Lithium-ion storage. The result was savings by 102 million Jordanian Dinar (JD) annually, and 698 GWh from the generation side.

Why should energy storage systems be installed in Jordanian power plants?

The lack of large energy storage systems prevents conventional power plants from running on maximum generation capacity, any extra generated power to the Jordanian electric loads will flow to Egypt via the tie line; installing large energy storage systems will enhance the electrical generation efficiency.

Why does the Jordanian national grid need an economic development?

The Jordanian national grid needs an economic development by managing the energy generation in order to decrease the generated energy price. The intermittent nature of output energy from the Renewable Energy Generators (REGs) varies instantaneously with any small variation in weather conditions .
