JR Energy Solution (JR ES) to commercialize and further scale-up Enevate's silicon-dominant XFC-EnergyR battery technology in the transportation, mobility and reserve power markets. ...

South Korea has also expressed interest in Raytheon's Standard Missile-6 (SM-6), which are expected to be budgeted for between 2023 and 2031. The KDX-III Batch II destroyers are reportedly equipped with up to 88 vertical launch system (VLS) cells, which would contain a mix of US- and Korean-made missiles.

System inertia is one measure of a power system's ability to maintain a stable frequency, but Korea's current power system reliability and electricity quality maintenance standards do not address it. A lack of system inertia can lead to an unreliable frequency in the power system and cause generators to trip, leading to power outages.

Two new nuclear plants for South Korea. Westinghouse has signed a contract with Doosan Heavy Industries and Construction Co and Korea Power Engineering Co that will see two Advanced Pressurised Reactor 1400 (APR 1400) nuclear plants built in South Korea.

We are excited to announce the we hiring a Junior Consultant Electrical Engineer. The work will include providing expert analyses and advice on offshore transmission systems, including high and low-voltage engineering in owner's engineer technical advisory, technical due diligence, and power systems desktop study roles.

The government plans to introduce a "clean hydrogen power system" for hydrogen power plants in 2023, but did not provide further details on the plan. The government has set a goal of meeting the total hydrogen demand of 27.9 million tons with clean hydrogen by 2050 and increasing the self-sufficiency rate of clean hydrogen to over 60%.

That is, since the 2 development of a network of 154kV power systems around the middle of the 1970's and the first operation of the 345kV extra-high voltage transmission line for domestic use in 1976, the construction of 7,281C-km of 345kV transmission lines by the end of 2000 contributed to a revolutionary improvement in supply reliability and a reduction of power ...

South Korea's Defense Acquisition Program Administration (DAPA) announced in early January that it is accelerating development of the Low-Altitude Missile Defence (LAMMD) system - nicknamed the "Korean Iron Dome" by some observers - by a year as a countermeasure against North Korean long-range artillery.
