

One of the largest in Latvia, the solar plant marks a key milestone in the country's shift to a green future. Go deeper with GlobalData. Reports. European Solar Farm Askion 10 Solar PV Park . ... The solar plant ...

Green Genius Latvia Solar PV Power Project is a ground-mounted solar project which is planned over 151 hectares. The project is expected to supply enough clean energy to power 41,000 households, to offset 100,000t of carbon dioxide emissions (CO2) a year.

Varme Solar PV Project is a 94MW solar PV power project. It is planned in Kuldiga, Latvia. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the under construction stage. It will be developed in a single phase. The project construction ...

Green Genius Latvia Solar PV Power Project is a ground-mounted solar project which is planned over 151 hectares. The project is expected to supply enough clean energy to power 41,000 ...

Riga is a 402MW hydro power project. It is located on Daugava river/basin in Riga, Latvia. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active. It has been developed in a single phase. Post completion of construction, the project got commissioned in 1974. Buy the profile here.

Derex has installed a 2.1MW floating solar farm in Latvia to power the Sloka wastewater treatment plant. By 2023, the Sungrow-designed system using RECOM Technologies" modules will reduce electricity costs and reliance on ...

The largest solar power plant in Latvia - Kalknes SPP - has commenced production in the Augsdaugava district. The project was developed by Merito Partners and Saules Energy with EUR 10 million investment from ...

Renewable energy includes wind, solar, biomass and geothermal energy sources. Almost half of the electricity used in the country is provided by renewable energy sources. The main renewable resource is hydroelectric power. Latvia has laws that regulate the building of power plants and plans to sell electricity at higher prices. This is a stimulus for investment, especially taking into ...

Sunly Latvia Solar PV Park is a 553MW solar PV power project. It is planned in Latvia. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It will be developed in a ...

The largest solar power plant in Latvia - Kalknes SPP - has commenced production in the Augsdaugava

district. The project was developed by Merito Partners and Saules Energy with EUR 10 million investment from Latvian investors and co-financing from Swedbank. Kalknes SPP will supply at least 6,500 households of the Daugavpils district with ...

Latvia Electricity Production: Gross: Solar Power Plants data was reported at 55.000 GWh in Sep 2024. This records a decrease from the previous number of 66.000 GWh for Aug 2024. Latvia Electricity Production: Gross: Solar Power Plants data is updated monthly, averaging 6.000 GWh (Median) from Jan 2023 to Sep 2024, with 21 observations. The data ...

Merito established the Merito Sustainable Energy FUND I with a total target size of 20 million euro to develop solar power plants in Latvia, wrote Labs of Latvia. So far, the fund has already attracted investments from dozens of local investors, and the fundraising is still ongoing, the company claims.

The company entered the Latvian market in 2020. Its upcoming portfolio of wind and solar will give it a combined capacity of 1.5GW. In May 2023, it gained a permit for the construction of a 250MW solar plant in Sicily, Italy. The solar plant will power 130,000 households while avoiding 165,000 tonnes of carbon emissions annually.

The electricity generated by the solar power plant will result in more than 1,600 tons of CO2 emissions being avoided and the company's impact on the environment will be significantly reduced. The solar power plant covers a total area of more than 10 hectares and has 11 520 solar panels with a capacity of 6.5 MW.

Broceni Solar PV Project is an 115MW solar PV power project. It is planned in Saldus, Latvia. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It will be developed in a ...

The most ambitious solar power plant in Latvia to date - Kalknes SES in the region of Augdaugava, near Daugavpils - has started production. The new power plant has sufficient production capacity to supply at least 6,500 households in Daugavpils, investors say, Latvian Radio reported on May 3. Kalknes SES is located in Kalkne parish, Augdaugava
