

What is a solar cell?

The Solar Cell is a block added by Environmental Tech. It is used to build the Solar Array. It comes in 6 tiers, each producing more power over the previous one when used in a Solar Array, although lower tier Arrays can't use high tier Cells to their maximum efficiency. Are Tier 3 aethium solar panels worth it?

Here is the list for your viewing pleasure: I've been spamming tier 3 aethium solars to power my base. They cost so much tin but it's well worth it for passive no hassle power. You can use UUMatter to make the interconnects to cut down on the Tin requirements. I used 4 "Tier 5" Aethium arrays... and utilized most of that power.

What are the chances of finding litherite?

When I look at JEI it shows two percentages of chances of finding Litherite at about 1% for the normal lens (these figures are based on my memory from last night) and then about 6% for another lens but it doesn't show a lens for the higher chance.

The rapid growth in Cambodia's solar panel exports underscores its emerging role in the global value chain. This surge coincided with the U.S. government's decision in June 2022 to diversify its supply chain from China and to temporarily exempt tariffs on solar cell and module imports from Cambodia, Malaysia, Thailand, and Vietnam.

The Rise of Cambodia's Solar Panel Industry. In recent years, Cambodia's economy has seen a shift towards

electrical and electronics manufacturing, specifically in the solar panel sector. The country's solar panel exports skyrocketed in 2022, reaching US\$1 billion, driven by the US government's tariff exemption.
