

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

How is electricity produced in Seychelles?

Electricity for the island nation of Seychelles is primarily produced by diesel generators which must import their fuel (69 MW on Mahe and 12 MW on Praslin). Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated.

What is Seychelles' energy policy?

Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated. This 6 MW power plant can produce up to 2% of the Seychelles' power and is located on Mahé Island. It is expected that the wind farm will replace 1.6 million litres of diesel fuel annually.

Is biomass a source of electricity in Seychelles?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Seychelles: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Why is Seychelles dependent on fossil fuels?

Seychelles is entirely dependent on the importation of fossil fuel to meet the nation's energy needs.

Who inaugurated the 5mwp solar farm in Seychelles?

The 5MWp Solar Farm was inaugurated on 12th December 2022 by the Vice President of the Republic of Seychelles, H.E. Ahmed Afif and the Deputy Director General of Abu Dhabi Fund for Development, H.E. Khalifa Abdulla Al Qubaisi.
