Solar energy - Electricity Generation: Solar radiation may be converted directly into solar power (electricity) by solar cells, or photovoltaic cells. In such cells, a small electric voltage is generated when light strikes the junction between a metal and a semiconductor (such as silicon) or the junction between two different semiconductors. (See photovoltaic effect.) ...

iGen design, supply and install solar photovoltaic (PV) systems which enable you to reduce your energy costs and help reach your environmental goals. We work with construction professionals, businesses and the public sector to deliver bespoke solar ...
