

What is matrix Energia's new digital power business unit?

In 2023, Matrix Energia launched its new Digital Power business unit, expanding its portfolio with energy efficiency and energy storage services, aiming to consolidate itself as an end-to-end platform. Matrix's key offering is the Battery Energy Storage System (BESS), a behind-the-meter battery storage solution.

Who is matrix Energia?

Founded in 2014, Matrix Energia is headquartered in São Paulo. By the end of 2023, the company had nearly 300 employees. Matrix is a digital energy platform that provides a complete ecosystem of tailored solutions through a customer-centric business model.

How does matrix generate energy?

Matrix generates renewable energy through its own solar power parks and oversees energy generation from third-party solar power plants. Additionally, Matrix owns over 1.3 GW of centralized generation assets that are ready for construction. Matrix is the largest independent energy trader in Brazil and the second largest retail energy trader.

How much energy did matrix generate in 2023?

In 2023, Matrix closed the year with more than 1,200 counterparts (buying and selling energy operations with generators, free consumers, special consumers, etc.) and served more than 1,050 consumption units (wholesale and retail clients), resulting in more than 27,000 GWh of energy originated in the year from operations in the Free Energy Market.

What is the primary energy supply in Indonesia?

in Indonesia 2.4.3. Petroleum (Oil) The primary energy supply to meet Indonesia's need for petroleum consists of crude oil production and import as well as fuel oil import. This crude oil for domestic consumption comes from domestic production and import. It will be processed in the local refineries to produce fuel and non-fuel products. So

Is biomass a source of electricity in Indonesia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Indonesia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.
