

How can Morocco improve its energy security?

As a net energy importer seeking to improve its energy security, Morocco has stepped up initiatives to achieve a level of domestic energy sovereignty. This includes following guidelines for transitioning to cleaner energy sources, with an emphasis on diversification.

Why does Morocco need to import energy?

Morocco is looking to increase the share of renewables in its power generation from around 20 percent today to 52 percent in 2030 and 80 percent by 2050. Four factors are the primary drivers for such ambitious plans. Morocco Needs to Import Energy Unlike many other countries in the MENA region, Morocco is not an oil- or gas-producing country.

What are Morocco's energy policy initiatives?

Beyond the advancement of renewable energy, Morocco's policy initiatives encompass energy efficiency measures in challenging-to-abate sectors, such as building insulation and the adoption of energy-saving light bulbs. The overarching objective is to achieve a 20% reduction in overall energy consumption by 2030.

How is Morocco pursuing a resilient energy future?

Morocco is pursuing a resilient energy future through a multifaceted approach. This includes a strategic focus on renewable energy sources to accompany its energy transition, and the diversification of its energy mix to ensure a sustainable energy transition without compromising energy security.

Does Morocco need energy?

Morocco Needs to Import Energy Unlike many other countries in the MENA region, Morocco is not an oil- or gas-producing country. In fact, Morocco is a net energy importer. In 2022, 90 percent of the country's energy needs were met through imported fossil fuels, including refined oil, gas, and coal.

How can Morocco transform its energy sector?

Morocco has embarked on an ambitious journey to transform its energy sector. This ambition is driven by the High Royal Orientations and has three key pillars: increasing renewable energy capacity, promoting energy efficiency, and fostering regional integration.
