OPW Pressure Vacuum vents are installed on the top of vent pipes from underground or aboveground fuel-storage tanks. They protect tanks from excessive over or under pressure. The vent cap and internal wire screen are designed to protect the tank vent lines against intrusion and blockage from water, debris or insects.

The investment aims to supply clean, affordable and reliable energy to the state through the development of new generation, storage and transmission infrastructure. WA Premier Roger Cook stater7s3d: "The energy transition is powering ahead under our Labor government, setting up WA's economy for the future.
