

What will Prony resources New Caledonia do with solar energy?

Per a 25-year renewable power purchase agreement, the clean energy produced from the solar projects will supply power to industrial operations of Prony Resources New Caledonia. TotalEnergies will use its expertise in solar projects to build a 160-MW solar project, with the first phase of 30 MW expected to come online by 2023.

What will TotalEnergies do in New Caledonia?

TotalEnergies SE TTE announced that it will develop clean energy and energy storage projects in New Caledonia. Within the 2022-2025 time period, TotalEnergies will develop ground-based photovoltaic arrays having a total capacity of 160 megawatts (MW) and energy battery storage capacity of 340 MWh in successive phases.

Will solar power increase global electricity capacity by 2026?

Per International Energy Agency ("IEA") report, by 2026, global renewable electricity capacity is forecast to rise more than 60% from 2020 levels to over 4,800 GW. The IEA report predicts that renewables are set to account for 95% of the increase in global electricity capacity through 2026, with solar PV alone providing more than half.

The hub would consist of up to 340 wind turbines and a 3.33GW solar farm. Image: Fortescue . The Fortescue Metals Group, an Australian mining company, has scrapped its plans to build a vast ...
