EDP is a transformative investment in El Salvador's clean energy future. The project is delivering approximately 30% of the country's energy demand with clean power and has modified the Salvadoran energy matrix by incorporating natural gas for generation and other uses, reducing the country's reliance on diesel and heavy fuel oil-fired power generation.

Bitcoin City & Bitcoins Bonds announcement by El Salvador's President Nayib Bukele. Bioenergy (19.6%), hydropower (3.5%), geothermal (3.4%), and solar (1.1%) were El Salvador's top renewable sources as of 2019. Electrical generation from sugar cane residue accounts for a large share of the bioenergy component. Since adopting the Paris agreement, El Salvador has ...

Javier Gonzalez, ASI's energy manager, emphasized El Salvador's remarkable achievement of covering over 70% of its energy demand with renewables, placing it among the top 20 countries globally. He underscored the country's diversified energy matrix--40% hydroelectric, 30% geothermal, with additional contributions from other renewables ...

The size and type of the plant needed to meet El Salvador's energy demands are still under consideration. Despite questions from Congresswoman Claudia Ortiz (Vamos), Alvarez could not provide precise figures on the state's investment over the seven-year plan. He emphasized that the numbers are still being analyzed, with a focus on ...
