Fact 1: Solar energy is a completely free source of energy and it is found in abundance. Though the sun is 90 million miles from the earth, it takes less than 10 minutes for light to travel from that much of distance. Fact 2: Solar energy which comprises of radiant heat and light from the sun can be harnessed with some modern technology like photo-voltaic, solar heating, artificial ...

Could someone recreate the Bouvet Island from the South Atlantic in Fallout 3? It's about .3 times the size of Washington, D.C., so it's not that large, not to mention, like, 93% of the island is glacier, and the only really detailed thing about it besides ice, is a long-abandoned lifeboat, a Norwegian weather station, some lichen, seals, and penguins.
