

MODYS (modular control and documentation system), that was specifically designed to control and document all recruitment steps in population-based studies. The general design of MODYS is outlined, and its implementation for the IDEFICS study is presented in detail. Furthermore, the analysis of paradata recorded by

For the Module Modules we use a Color Palette system, so the raw Models are grey scaled. Ontop of that there are ways to provide material/ or group of material based model substitutes, a good example for that are the different armors, magma, netherite and all fabrics use a different model each. ... Truly Modular takes a very different approach ...

Colors & Items: Colors: This mod contains color variants for my new and overhauled 20 Military Sets uses my Military Palette Texture Library. All items were primarily colored to go with my other military mods that have been overhauled to Update 3.0, or are new releases. The camo patterns are monochromatic, and all variants have a distinct accent color.

Some MES (Modular Encounter Systems) content mods updated/rebranded! PSA From the Workshop pages: Mod Rebranding. Previously, there were 3 mods (Air Traffic, Surface Occupation, and Reddit Custom Encounters) that contained a variety of ships and stations. These three mods were reworked to have modernized grid systems, and to fit into 3 faction ...

The theme and design of Modular Systems is modularity. Cuboid. Cuboid Multi-block structures were a founding principle design of Modular Systems (Formerly Modular Furnaces). Instead of only forming a multi-block out of modded blocks, the mod allows the player to use material blocks in forming the Cuboid that can have various effects on the ...

Previously, this mod was two separate framework mods called Modular Encounters Spawner and RivalAI. Previous to those mods, there were two older framework mods that controlled spawning for Planetary Cargo Ships and Planetary Installations. All of these framework mods were difficult to manage as separate mods, so a decision was made to merge them all into a single framework.

Cuboid Multi-block structures were a founding principle design of Modular Systems (Formerly Modular Furnaces). Instead of only forming a multi-block out of modded blocks, the mod allows the player to use material blocks in forming the Cuboid that can have various effects on the speed and fuel efficiency of the final assembled multi-block.

If a character uses UNP body, then when (and ONLY when) they equip the body-slot armor from Modular Clothing System, their shape will be replaced with the vanilla body reference that is attached to that piece of armor. Same for hands and feet if you equip hand or foot pieces. For objects without a body reference attached (like the pauldrons ...

This gets activated by default if loaded with Iris and Oculus. This can be deactivated in the Config or force activated if other mods create issues with Truly Modular's Rendering; Truly Modular uses an Automatic compat by default, this means most mods Swords and Materials should get picked up, dedicated compat is possible through datapacks.

Synergies, property injections, and skins are multiple systems that are able to add/modify a module's and/or item's properties. Generative Materials: Truly Modular automatically tries to scan other mods' content to add materials automatically. Handmade materials are obviously higher quality, but this adds a good bridge while there is no ...

It is just a UNP conversion of the popular mod Modular Clothing System, for those people that use UNP body shape.
