Depleting oil and gas resources, and a 79% growth in Trinidad and Tobago's carbon footprint: these alone should provide enough impetus to resolve the many problems associated with renewable energy and energy efficiency by Dr Zaffar Khan, Programme Director, UWI-Arthur Lok Jack Global School of Business and Atiyyah A. Khan, Energy Consultant, Econsultants ...

renewable energy. Trinidad & Tobago pledged as commitments under the Paris Agreement to increase the percentage of renewables onto its energy mix; decarbonize its industry; and endorse clean and efficient transportation. Wind energy is a direct answer to these first two pillars, ultimately contributing to the third.

Renewable energy potential: Although the focus has primarily been on fossil fuels, Trinidad and Tobago is exploring renewable energy options such as solar and wind power. The government recognizes the need to diversify its energy sources and reduce reliance on hydrocarbons, paving the way for a more sustainable future.

As a locally owned and operated logistics company in Trinidad and Tobago, we recognize the value of collaboration and work closely with our clients and partners to achieve shared goals. Teamwork is ingrained in our company culture, and we actively foster strong relationships built on trust, open communication, and mutual respect.

This approach provides a practical, cost-effective solution for integrating renewable energy into existing infrastructure, creating a stable and decarbonized energy supply. Unlike traditional energy storage, the Carbon Bridge can scale rapidly and operate efficiently without subsidies, making it applicable in both developed and developing regions.
