

What is Orkan energy doing in Kirchweidach?

From industry to geothermal energy: Orkan Energy has implemented the first large-scale geothermal project in Kirchweidach. Six efficiency PACKs convert the excess heat from the geothermal plant into electricity in a highly effective manner, saving 4,000 tons of CO₂ annually.

Where can Orkan energy implement its solutions?

Orkan Energy can implement its solutions wherever waste heat is generated: for example, on engines, in industrial processes, or on ships. Since its founding, Orkan Energy has already caught up with the previously leading traditional Organic Rankine Cycle (ORC) providers.

Does Orkan energy save CO₂?

Orkan Energy addresses this need through its proven technology that turns unused waste heat into clean electricity at the worldwide lowest possible generation costs. Orkan Energy's units sold in 2022 alone will save about 1 million tonnes of CO₂ over their lifetime.

Who invested in Orkan energy?

In 2011, Orkan Energy gained its first venture partner in Wellington Partners and Kleiner, Perkins, Caufield and Byers (KPCB). They were followed by strategic investors E.ON and Aliad, the venture capital subsidiary of global market leader Air Liquide, along with the Swiss impact investment firm Quadia.

What can Orkan energy do for You?

The global potential for Orkan Energy's solution is massive. The company's technology capitalizes on small to medium heat sources in the low-temperature segment, unlocking applications in a wide range of industries such as marine, cement, steel, geothermal, oil and gas, as well as power generation.
