

Can Qudra power Palestine?

By addressing critical issues like financing, engineering expertise, and access to land, Qudra is not only powering Palestine but also offering a blueprint for sustainable energy solutions in similar regions. As Hijawi aptly put it, "Palestinians urgently need electricity, but they face significant bottlenecks."

How can Qudra help bridge the energy gap in Palestine?

By expanding solar access, Qudra is helping bridge this energy gap, enabling communities to thrive and industries to grow. Operating in Palestine presents unique challenges, particularly in securing financing and dealing with the political complexities that often disrupt the region's economic stability.

How did solar power work in Gaza?

We renovated 20 desalination plants that provided 15,000 Liters/day across the Gaza strip by deploying solar systems to power them. We installed tens of solar systems to support nebulizers and electric mattresses, in homes with disabled individuals. We installed solar street lights in communities serving more than 7000 people.

One of the reasons Energix selected First Solar (est. 1999) as a key supplier is that the company exclusively manufactures cadmium telluride (CdTe) solar panels, which it claims are 21.5 percent more efficient than multi-crystalline silicon-based panels and cost less than \$0.43-\$0.46 per watt.

As the Israeli government cuts off fuel supplies to the besieged Palestinian enclave of Gaza, solar panels are providing a lifeline for some of the area's two million residents. For years, the region has suffered blackouts which worsen during Israeli attacks and wealthier Gazans have turned to solar panels for reliable electricity.
