

Will 70% of Panama's energy supply be renewable after 35 years?

Yes, according to Panama's National Energy Plan 2015-2050. Panama's National Energy Plan 2015-2050 suggests that 70% of the country's energy supply could be renewable after 35 years. The plan was adopted as a long-term roadmap to diversify the energy sector and advance energy access, energy efficiency, energy security and overall decarbonisation of the energy system.

What is Panama's energy supply?

This page is part of Global Energy Monitor's Latin America Energy Portal. Panama currently relies on imported oil for the majority of its total energy supply. In the electrical sector, hydro energy also plays a key role, accounting for 43.9% of installed capacity and 67.2% of total generation as of 2020.

What is Panama's Plan Energético Nacional?

The PEN (Plan Energético Nacional) 2015-2050 aims to drastically increase the use of renewable energy in Panama to 70% of the country's energy mix. Panama aims to be carbon neutral by 2050, partially by emphasizing forest restoration to absorb CO2 emissions.

Where can I study energy and Environmental Engineering in Panama?

These include the energy and environmental engineering course offered by the Technological University of Panama (UTP) at the undergraduate, master's and doctoral levels, and upcoming degrees at the University of Panama (UP) in electricity and renewable energy engineering.

How can Panama adapt its energy system?

To adapt Panama's energy system to this evolving paradigm, a comprehensive plan is needed that considers a rapid growth in demand from the electrification of transport, including from the introduction of expanded metro lines, electric passenger vehicles and electric buses.

Which sector consumes the most energy in Panama?

The transport sector includes both cargo and passenger transport, and is the largest consumer in Panama's total final energy consumption, at around 45% (Figure 3). The number of vehicles on the road in Panama has accelerated in recent years, from 564 155 in 2012 to 718 518 in 2015 (Figure 7).

Enel Green Power Panama (EGPP) has signed a power purchase agreement (PPA) with state lender National Bank of Panama (Banconal). Under its terms, the Panamanian subsidiary of Italy's Enel SpA (BIT:ENEL) will energise five of the bank's branches, allowing Banconal to achieve an energy saving target of about EUR 420,000 (USD 496,000), the ...
