

What is Panama's energy supply?

This page is part of Global Energy Monitor's Latin America Energy Portal. Panama currently relies on imported oil for the majority of its total energy supply. In the electrical sector, hydro energy also plays a key role, accounting for 43.9% of installed capacity and 67.2% of total generation as of 2020.

What is Panama's Plan Energético Nacional?

The PEN (Plan Energético Nacional) 2015-2050 aims to drastically increase the use of renewable energy in Panama to 70% of the country's energy mix. Panama aims to be carbon neutral by 2050, partially by emphasizing forest restoration to absorb CO2 emissions.

Who regulates the electricity sector in Panama?

The ASEP (Autoridad Nacional de los Servicios Públicos) is responsible for regulation of the electricity sector in Panama. The ASEP oversees all aspects of Panama's electrical sector. Panama does not have a national oil company. Naturgy is the leading energy distributor in Panama.

Who is responsible for energy distribution in Panama?

Three distributors are responsible for energy distribution in Panama: ENSA, Edemet, and Edechi. Electricity is distributed via Panama's nationally interconnected system (SIN). Electricity prices are impacted by weather patterns because of Panama's use of hydropower.

How much coal does Panama use?

As of 2016, Panama consumed 330,693 short tons of imported coal and ranked 86th in the world for coal consumption. In September 2021, the Panamanian energy minister announced a push towards clean energy with the notable pillar of ending coal use in power plants by 2023.

Is biomass a source of electricity in Panama?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Panama: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.
