

Is the Eritrean government facilitating oil & gas exploration?

The Eritrean government is facilitating oil and gas exploration, examining the potential of geothermal energy generation, and open to utilizing excellent wind energy resources as a driver to export-oriented industrial growth, but these scenarios are fairly speculative at this stage, and thus beyond the scope of the present study.

How important are energy services in Eritrea?

In Eritrea, as in many Sub-Saharan African countries, energy services are a large part of both the monetary and non-monetary economies. It is possible that in Eritrea, as much as 20% of total expenditures, effort, and socioeconomic costs are related to energy services.

How much energy does Eritrea use?

Energy in Eritrea is an industry lacking in natural resources, though it has plenty of potential. Eritrea's final consumption of electricity is 33 kilotonne of oil equivalent (ktoe). In 2019, some off-the-grid community systems rely on a combination of solar power, diesel generators and grid batteries.

Does Eritrean energy sector need investment capital?

With regards to energy sector investment and development, the Eritrean energy sector has a demand for investment capital. Local private investors, foreign private investors, the government, development aid agencies and banks all supply investment capital and financing for economic and energy sector development investments.

Does Eritrea have a solar grid?

Eritrea has two hybrid mini-grids (solar-diesel) with a total capacity of 2.25 MW. One is in the town of Areza with a production capacity of 1.25 MW; another is in Maidma with a production capacity of 1 MW. Both use photovoltaic solar panels connected to lithium batteries.

Is Eritrean energy policy aggressive?

The Eritrean government shows substantial interest in efficiency and renewable energy but has fairly limited capital and expertise for implementing aggressive programs so present programs are moderately aggressive.
