This move extends the benefit of trustworthy solar solutions to more South Africans, reinforcing the idea that solar is a good investment for a growing number of homeowners. ...

The HOMO is the highest energy orbital that is fully occupied by electrons in a molecule. It represents the highest energy molecular orbital from which an electron can be excited to a higher energy level, such as the LUMO. The energy of the HOMO is critical in determining the molecule's ability to donate electrons (i.e., its oxidation potential).

Having helped more than 5,000 South Africans adopt solar power already, we have ample experience to draw from and have a long line of satisfied customers to show for it.

We now offer the Sunsynk Inverter product range paired with the equally powerful Freedom Won batteries. Catering specifically for the South African market, the Sunsynk inverter, with its impressive reputation in the residential solar industry, and the locally produced Freedom Won batteries combine to provide an energy solutions to meet most needs and budgets.

Deciding to buy or lease your solar energy system depends on your goals. If maximising financial returns and taking advantage of the solar panel tax credit or tax rebate is your priority, purchasing the system is likely the best option. For a hassle-free way to lower energy bills and help the environment, a solar lease might be ideal.
