

Why should Peru build a port?

The port is designed to be a strategic point of connection between South America and Asia, particularly with China, Peru's largest trading partner. The port will enable Peru to become a key logistics hub in the Pacific region, significantly reducing freight transport times to and from Asia.

What is Peru's biggest trade partner?

China is Peru's largest trade partner, with copper, iron and fishmeal making up the bulk of exports worth a total of \$23.1bn in 2023. US-bound exports amounted to \$9.1bn. "There are some opportunities that [the US] is missing, so it's important that they know a little more about our market," Le&#243;n said. Total trade (\$bn)

What are the risks to Peru?

"The risks to Peru are at multiple levels," said Evan Ellis, professor of Latin American studies at the US Army War College. "Risk number one is the country not reaping the benefits of its abundant resources and geographic position, but rather the Chinese getting those benefits."

Will the port of Chancay make Peru more competitive?

Analysts point out that the particularities of the port of Chancay will allow a reduction in transportation costs of around 30%, which will make Peru significantly more competitive with other countries in the region.

Is Peru becoming dependent on China?

"So we can't generalise and say that Peru is practically becoming dependent on China," she said. The US had discussed Chancay with Peru, the US state department said, and raised "the importance of adequate oversight, security, regulation and fair competition for all key infrastructure projects".

Who owns Enel power in Peru?

In April 2023, China Southern Power Grid acquired Enel's Peruvian electricity business, which supplies power to the northern part of Lima, the country's capital. The rest of Lima's electricity supply was sold in 2020 to China's Three Gorges Corporation, which also owns a Peruvian hydroelectric dam.
