

What is Alstom doing in the Philippines?

Alstom-led consortium to provide integrated railway system for the Philippines' North-South Commuter Railway Extension Project 1/2 Alstom will be pioneering Southeast Asia's first-ever ETCS Level 2 mainline signalling system in the Philippines.

What is Alstom Power Systems?

Alstom Power Systems GmbH, based in Mannheim, plans, builds, and sells worldwide fossil-fueled power plants and turbines. They offer power plant modernization, gas and combined cycle power plants, and engineering and control systems. Alstom was significantly involved in the construction of the new Rheinhafen steam power station 8 of EnBW in Karlsruhe.

What is happening at Alstom?

Project ongoing in the country. Alstom will deliver a complete system including modern signalling system (ETCS Level 1), communication system, traction power supply, and track works on the 12km extended line including one new depot.

What is ETCS & why should you choose Alstom?

Alstom is the worldwide number one in on-board ETCS equipment via its Atlas solution, representing 70% of the on-board systems in service in ETCS level 2. This ETCS technology brings significant benefits in terms of interoperability, safety, system capacity, service reliability and energy efficiency.

Why is Alstom launching an integrated rail network?

"This project not only solidifies our market leadership in the region but is also a bold step in the country in achieving an integrated rail network that applies advances in mainline signalling for more efficient and sustainable mobility," said Ling Fang, President of Asia Pacific at Alstom.

Why is Alstom extending the LRT-1 Line?

Building on its successful revamping and extending the LRT-1 line, this project underscores Alstom's ongoing commitment to the Philippines' railway sector. By delivering innovative and sustainable mobility solutions, Alstom aims to enhance the daily lives of Filipinos and contribute to the country's economic growth.
