

The battery energy storage system supplied by Pixii has 1 MW of conversion capacity and 6 MWh of storage capacity. The solution is based on Pixii's proven PowerShaper product family. It is installed indoors at the central office and datacenter site in M&#252;nster. Pixii is also working with PASM on further installations

The "Battery In the Grid" (B.I.G) model is transforming how DSO's build and maintain infrastructure and turning batteries into an exciting investment tool. Electricity grids are at a tipping point. The swift pace of ...

Pixii's smart battery energy storage solution in Lierne is more than just an energy remedy; Businesses in the Jule Industrial area now operate unhampered, and the area stands at the cusp of new job opportunities and industrial growth. The Lierne pilot project has exceeded expectations, reducing the cost of network loss for Tensio in the area ...

Pixii is thrilled to announce that it is recognised as the fastest-growing tech company in Norway, securing the top position in the prestigious Deloitte Technology Fast 50 award. ... The jury writes that Pixii has developed ...

Deutsche Telekom has announced the first battery energy storage system installation in a 300MWh rollout in Germany, with Norwegian firm Pixii the technology provider. The first system, a 1MW/6MWh unit, has been ...

The Pixii battery energy storage system is designed to be managed and controlled remotely. The built-in communication gateway, allows you to connect with all elements within the system, as well as external sensors and other ...

Allow for shared battery storage embedded in your network, closer to the end-user, enabling customers to lower their energy bills by utilizing more of their generated renewable power, reducing carbon footprint and stabilizing the grid. ... Pixii AS is committed to protecting and respecting your privacy, and we'll only use your personal ...

Meet us at The Battery Show India! We're excited to connect with the Indian battery community at The Battery Show India, which runs from October 3-5 at the India Expo Centre, Greater Noida. You can find us in Hall ...

The Pixii BESS is more than just a battery - it's an investment in the future. With our extensive expertise combined with a dynamic value stacking model, Pixii offers unparalleled ROI, making it the ideal choice for any ...

The Pixii battery energy storage system is built for seamless remote management and control. The integrated communication gateway connects all system elements, external sensors, and hardware, enabling you to unlock both cost-saving and revenue-generating services. ... Pixii Gateway Web App - for easy configuration and advanced monitoring.

The partnership aims to enhance grid flexibility and support increased demand at busy charging stations by integrating Pixii's battery systems with EV chargers. This initiative will reduce grid dependency and operational costs, streamline integration, and increase the scalability and efficiency of energy distribution in fast-charging ...

In response, TGN Energy and Pixii introduced a state-of-the-art solution: the Pixii PowerShaper Battery Energy Storage System (BESS), integrated with TGN Grid. This advanced system serves as the brain of the energy operation, employing intelligent algorithms to decide whether to store or utilize the energy based on predefined targets.

Lede chose to collaborate with Pixii, installing a single PowerShaper cabinet. Pixii's sophisticated BESS, equipped with smart inverter technology, not only manages overvoltage; it introduces a streamlined approach to grid management, minimizing the physical and financial disruptions associated with traditional methods.

### The Benefits

The Pixii battery energy storage system is designed to be managed and controlled remotely. The built-in communication gateway, allows you to connect with all elements within the system, as well as external sensors and other hardware at your site.. And with the Pixii Gateway web-app, you can configure a wide range of services, monitor and optimize

It's bi-directional power architecture enables energy to flow in both directions, from grid to battery and battery to grid, making it compact, reliable, and cost effective. It connects with a wide range of energy sources, like solar, grid, generator and more, giving you unrivalled flexibility. ... Pixii AS is committed to protecting and ...

Support loads from the battery when electricity rates are high, and charge the battery when electricity rates are low. PV self-consumption Get the most out of your solar investment and reduce your dependency on the grid through smart power management, enabling you to direct excess energy to batteries for later use during peak hours.
