

When did solar thermal energy become a key energy source in Argentina?

Solar thermal energy in Argentina was already considered a potential key energy source in 1975, when a national R&D program for the development of solar energy and other renewables was launched, leading to numerous research programs (see next section) and the elaboration of norms and certification criteria for ST collectors .

How much solar power does Argentina have?

Overall, Argentina's total installed power as of March stands at 43,874 MW, with solar energy sources covering 3.33% of the nation's energy needs, marking a significant milestone in its transition towards a more sustainable energy future. Loading...

Why is solar energy important in Argentina?

The north of Argentina experiences high levels of solar radiation and has the capacity to produce electricity and jobs for rural and underserved communities in the country. Unfortunately, there are several factors limiting the total deployment of renewable energy in Argentina.

What are the top solar companies in Argentina?

Notable brands include Huawei at 40%, SMA at 13%, and Schneider at 10%, showcasing the diverse array of technologies powering Argentina's solar energy revolution. In terms of total installed renewable capacity, Argentina boasts 16,782 MW, with large hydroelectric plants dominating at 64.5%.

Should Argentina invest in solar energy?

If Argentina were able to stabilize its economy and provide better incentives for solar, investors would be more apt to support renewable energy projects. However, the lack of residential distributed generation projects is hindering mainstream solar adoption.

Is there a gap between solar and solar energy deployment in Argentina?

Author to whom correspondence should be addressed. There is a large gap between the vast solar resources and the magnitude of solar energy deployment in Argentina. In the case of photovoltaics, the country only reached the 1000 GWh electricity generated yearly landmark in 2020.

The scheme was launched by Prime Minister Narendra Modi on February 15, 2024. Under the scheme, households will be provided with a subsidy to install solar panels on their roofs.
