

What can Puerto Rico do to support end-use electrification?

To meet these goals and support widespread end-use electrification, Puerto Rico is exploring renewable energy and other generation technologies for energy storage, distributed generation, distribution control, electric vehicles, and energy efficient and responsive loads that can be deployed in each of Puerto Rico's cities and communities.

How can NREL support energy planning in Puerto Rico?

NREL's ongoing and past activities to support energy planning in Puerto Rico, including publications, tools, and other resources, is available on the lab's Multi-Lab Energy Planning Support for Puerto Rico webpage. Puerto Rico has committed to meeting its electricity needs with 100% renewable energy by 2050.

What is Puerto Rico's PR100 program?

Launched on February 2, 2022, PR100 entails five activities, with an emphasis on modeling and analyzing scenarios that meet Puerto Rico's renewable energy targets and achieve short-term recovery goals and long-term energy resilience.

How much money does Puerto Rico have to pay for solar?

Up to \$190 million is available to Puerto Rico's Housing Administration and a private company to pay for solar and battery installations in public housing common areas and subsidized, multifamily housing properties. Another \$175 million is available for certain healthcare and dialysis centers.

Why did Puerto Rico get a power outage?

The announcement comes as the U.S. territory continues to struggle with chronic power outages that have worsened since Hurricane Maria pummeled the island as a powerful Category 4 storm in 2017, razing the electric grid. The outages also are blamed on a lack of maintenance and investment in its electric grid for decades.

Puerto Rico consumes almost 70 times more energy than it produces, and the Commonwealth's energy consumption per capita is roughly one-fourth of the average in the 50 U.S. states. Fossil fuels generate 94% of Puerto Rico's electricity, contributing to the island having a higher average electricity price than any U.S. state, except for Hawaii.

5 Background: On February 21, 2023, the Grid Deployment Office launched the PR-ERF to support improvements to Puerto Rico's electric grid. After recent natural disasters and decades of underinvestment in the electric grid, this fund is being developed in consultation with local entities and communities to increase energy resilience and reduce the energy burden of vulnerable

Arecibo, Puerto Rico Energy Answers Arecibo, LLC (Energy Answers) plans to request financial assistance

from the USDA Rural Utilities Service (RUS) to finance construction and operation of the proposed Arecibo Waste to Energy Generation and Resource Recovery Facility Project in Arecibo, Puerto Rico. To obtain additional information or to provide comments, please contact ...

The Puerto Rico Energy Bureau (PREB) is the independent and specialized body created by Act 57-2014, as amended, to serve as key component for the full and transparent implementation of the Energy Reform. Specifically, the PREB has the responsibility to regulate, monitor and enforce the energy public policy of the Government of Puerto Rico. Mission
