

Will Jamaica achieve 30 per cent of its energy consumption from renewables?

Minister of Science, Energy and Technology, Dr. the Hon. Andrew Wheatley, stated that Jamaica is on course to consuming 30 per cent of its energy from renewables by 2030. As of last year, 10.5 per cent of net electricity generated in Jamaica was obtained from renewable energy.

How is Jamaica's energy future being secured?

Jamaica's energy future is being secured through Goal 7: Jamaica's industry structures embracing eco-efficiency for advancing international competitiveness, and moving towards building a green economy.

Does Jamaica have a better record of implementing the National Energy Policy?

According to the MEM (2009), nineteen (19) state entities will play key roles in implementing the seven goals of the National Energy Policy. However, all the agencies will be coordinated by the MEM. One of the main concerns of this study is that Jamaica has a better record of planning than that of implementation.
