Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

How reliable are solar panels?

Solar panels convert the light from the sun into electricity, with no moving parts they are very reliable a 30 year life is realistic, that means with payback averaged at 9 years, you can have 21 years of free electricity! Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity).

The Isle of Man is home to many palm trees, normally growing in Southern Europe, they find the mild Manx climate well suited, as air temperatures rarely drop below zero. Heat pumps are also well suited to the Manx climate, which has an average annual temperature of 10°C, in comparison the UK's average temperature is 7°C.

When investigating solar panels there are many questions: how many panels can my roof take? what will they look like? the price? how much power generated? yearly returns? go green use ...

By all statistical accounts, the Isle of Man is leading by far. A murder rate of 0.00, 4th highest GDP per capita in Europe, higher average post-tax incomes than in UK, 1% unemployment, closed-door immigration system, and a small government where the average resident has a strong say in the direction of the country.

Proposals for the very first utility-scale solar farm on the Isle of Man have been released by designer Peel Cubico Renewables (PCR). The 26MW Billown Solar Farm in Malew, near Castletown, would certainly produce enough power to fulfill more than 5% of the Isle of Man's power demand, when functional in 2024.

Stephen Snowdon, Planning & Development Manager at Peel Cubico Renewables said: "Our vision for this solar farm supports both the Isle of Man's response to climate change and the government's ambitions for renewable energy projects to help secure a bright economic future for the island. We also recognise the cost-of-living crisis facing ...

My swollen limbs are visibly reduced in size following treatment. This enables me to move more easily with greater range. Mr R; Not only has the treatment reduces the size of my swollen legs but it has enabled me to reduce the need for daily pain relief allowing natural sleep.

2 ???· "I now have faith in our capacity to collectively take hold of a future in which everybody, women, men, can live together in harmony, in respect and mutual understanding." When asked about the sentences she responded: "I respect the courts and their decision".

"The solar farm would generate enough power to meet more than 7% of the Isle of Man's current electricity demand and support the Government's aim for electricity on the Island to be 100% green by 2030." The project represents an investment of around £30m across the 40-year anticipated life of the project, with no public investment.

Air Source Heat Pumps A highly recommended heat pump manufacturer and popular choice with our customers is Mitsubishi. For a typical 3 or 4 bedroom property in the Isle of Man we would install a heat pump out of their EcoDan range, an 11.2kw Ashp complete with a 200L cylinder would cost approximately £12,500, this includes installing and decommissioning of existing ...
