Back to News Chinese government lays out strict regulations for the lithium-ion battery industry Published 10 May 2024 China's Ministry of Industry and Information Technology (MIIT) has outlined its standard conditions of the lithium-ion battery industry. ...

Rho Motion's evaluation, opportunities lie in future LFP volumes. The LFP recycling market remains constrained by the availability of feedstock, with most feedstock focused in China. However, as more LFP feedstock become available, there is potential for growth. As OEMs and battery producers increase their LFP product lines, the volume of LFP ...

In 2023, BYD sold just over 15,000 vehicles in the EU & EFTA & UK according to the Rho Motion EV & Battery Database. In the first six months of 2024, it has already matched this figure. Targeting Europe as a key area for expansion, BYD recently sponsored the UEFA European Football Championship to boost its brand presence in the region. ...

At the end of August, US battery recycler, Cirba Solutions, officially opened its expanded black mass-producing facility in Lancaster, Ohio. With the support of federal funding from the Bipartisan Infrastructure Law (BIL), Cirba Solutions has added two additional processing lines, now capable of producing 20,000 tonnes of black mass per year, one fully operational ...

Shan Tomouk, Charging and Energy lead at Rho Motion commented in September 2023, "The European

market is fragmented with a multitude of players vying for market share, this is expected to consolidate over time" and "consolidation is beginning to take hold in the US market."

Rho Motion, the leading EV research-house has today revealed that over 1.7 million EVs were sold over the month of October overtaking the previous record, set in September, by 50,000. The Chinese EV market has once again set another monthly record with 1.2 million units sold, growing by 6% compared to the previous month and by over 50% ...

Europe's EV sales have shrunk year to date, raising concerns among OEMs and policy groups about meeting the EU's 2025 CO 2 target. The European Automobile Manufacturers' Association (ACEA), a lobbying group made up of 15 of Europe's major car, truck, van and bus makers, has called on the EU to reconsider the 2025 CO 2 target. This follows ...

Request the recording of our recent webinar on the EV and battery market. Our expert analyst team explored the potential impact of the 2024 election, assessing possible changes in legislation, and discussing the future of EV production and clean energy investments in the U.S.

Europe's homegrown battery industry has taken another hit this month as both Northvolt and VW scale back battery production plans. Following an initial strategic review of its operations, Northvolt plans to put a primary focus on its large scale cell manufacturing, deprioritising its cathode and energy storage systems production.
