With load ranges typically between 120W and 1000W, and in 12, 24 and 48V options, the system is perfect for a great variety of applications. ... 48 and 60 volt battery back-up systems. Compact ""All-in-one"" plug-in controller. Comprehensive functionality in a small box ...

Our Uninterruptible Power Solutions (UPS) protect against mains power issues to ensure safe operation, protect people and reduce the risk of downtime and system failures. From oil and gas and transportation to utilities, nuclear power and other critical infrastructure, we provide rugged, fully reliable electrical power back-up solutions that ...

When Connect was formed in 2013 we inherited already aging pipe systems. Since then we have come a long way in renovating, modifying and upgrading these pipe systems so that they can carry a higher volume of water and have a longer lifespan. Raw water collection systems are constantly being improved to make the most of the rainfall we get.

Two engineers from Schneider Electrical, providers of energy and automation digital solutions for efficiency and sustainability, will be arriving on the Titan Charter flight from the UK today Monday, 7 March 2022. The purpose of their visit is to commission critical backup battery solutions at three sites on-Island that accommodate equipment of essential services. ...

Members of the public are advised that Generators No. 3 and No. 5 continue to operate at the Power Station. The replacement part for Generator No. 1 has been sourced and has arrived in South Africa. It is expected that this will arrive on-Island on Saturday 4 February 2023. Work will then be undertaken to [...]

Check out this recent installation of a battery backup in Saint Helena, CA. This customer loves their new battery backup, evening sharing, "[I] went with NRG Clean Power to purchase my new LG Chem battery for added storage. I was given a great price and the critical loads of my home are covered in case of an outage." While this homeowner already had solar panels, we see ...

SYSTEMS TO THE ELECTRICITY GRID IN ST HELENA . Version 1: ... o mitigate the impact of PV systems on the quality of power to other users; o ensure that best practice, particularly the requirements under the British/IET Electrical Wiring ... St Helena's energy strategy will aim to improve the social and economic

well-being of its population,

This means that there is sufficient generation capacity at the Power Station so that if there was a fault on any one of the generators, there is enough back-up capacity to meet the demand for electricity across the Island. ...
