

Saint Pierre and Miquelon cost of 15 solar panels

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

How much does a DIY solar panel cost in France?

The average price for a DIY kit including 16 panels is around EUR6,250. These are generally capable of producing 64,000Wh (watt-hours, or 6.4 kWh), which is about 1.5x the power consumption of an average household in France.

How many solar panels are installed in France?

Solar panel installations are increasing in France with the last year seeing over 200,000 installations across the country as prices fell. This includes installations from both professionals and from DIY kits, which allow homeowners to set up the panels by themselves. Read more: [Why record numbers of homeowners in France are installing solar panels](#)

Can you have solar panels on a property in France?

Other rules may apply if your property in France is located in certain historic areas. Read more: [Can you have solar panels on homes in historic areas of France?](#) You will also need to contact Consuel for an Attestation de Conformité to confirm your installation is safe to be connected to the main power grid, which costs EUR180.

How much power does a solar panel produce?

New-generation plug-and-play solar panels have an average power output of around 400 watt-peak (Wp) each, which is close to a standard photovoltaic module with a power output of between 375 and 500 Wp. Read also: [MAP: How long before home solar panels cover costs in France?](#)
