

Nous sommes dédiés à offrir des solutions sur mesure, efficaces et fiables, parfaitement adaptées à vos besoins spécifiques. Chez SCS ENERGIE, nous nous engageons à garantir la qualité et la performance pour assurer le confort de votre maison ou ...

Accredited Verification Body. SCS is accredited to ISO 14065 by the ANSI National Accreditation Board (ANAB) to offer carbon offset project validation and verification under the Verified Carbon Standard (VCS), the Climate Action Reserve (CAR), the American Carbon Registry (ACR), the Climate, Community & Biodiversity Standards (CCB), the Sustainable ...

Landfill Gas and LFGE National Experts: LFGE and Biogas to Energy: Jeff Grill Gas Collection and Control Systems (GCCS): Eric Peterson and Justin Stevenson LFG Modeling: Alex Stege SCS Engineers is a national leader in planning, permitting, investigating, designing, constructing, and operating landfill gas (LFG) control and recovery systems.

SCS Energy extracts the methane gas that is produced by decomposition and turns it into a usable form of energy. They are a key component in maintaining our planet's sustainability, while still promoting ...

Le ministre du Pétrole et du Gaz, Vincent de Paul Massassa, a reçu le 4 mai 2023 Lin G Espey et Urbain Beka Nguema, respectivement Président-directeur général et Directeur général Gabon de BW Energy. L'objectif de cette rencontre visait à faire le point des activités de l'opérateur pétrolier américain au Gabon, notamment en ce qui concerne les ses ...

Jeff joined SCS Energy in 2019, leading the process engineering team responsible for the design of biogas to renewable natural gas & energy facilities. He has over 20 years of experience in energy and renewable natural gas (RNG) project development. His background is in chemical process engineering and a wide array of engineering and ...

Bapco Energies Unveils BeVentures and Appoints Areije Al Shakar as CEO Bapco Energies, a leading force in Bahrain's energy transformation, has announced the establishment of its new subsidiary, BeVentures, alongside the appointment of ...

Gabon: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

In the future, the Carbon Footprint National Innovation Alliance will work with SCS Global Services to help

more companies effectively use recycled materials, reduce energy consumption and carbon emissions, and jointly promote the world's move towards a sustainable future of low-carbon circular economy.

Southwestern Community Services strives to empower low income people and families. With dignity and respect, SCS provides direct assistance, reduce stressors, and advocate for such persons and families as they lift themselves toward self-sufficiency.

December 14, 2020 SCS Energy: Landfill Methane to Renewable Natural Gas, 5.1 Million Gas Gallon Equivalents of RNG Annually. The New River RNG facility will capture and convert approximately 1,900 dekatherms per day of landfill methane to renewable natural gas (RNG), which is enough to offset emissions from 7,500 ...

The landfill gas-to-RNG plant designed by SCS protects the environment while providing cost-effective renewable cleaner-burning energy solutions. SCS Energy is a practice of SCS Engineers specializing in biogas, anaerobic digestion, renewable natural gas and energy systems for industrial and agricultural operations.

Die scs energie AG nutzt brachliegende Flächen für die Entwicklung und den Betrieb von Kraftwerken zur nachhaltigen Energieversorgung. Damit liefern wir sauberen Strom und leisten zugleich einen Beitrag gegen den fortschreitenden Flächenverbrauch. Jetzt mehr erfahren!

SCS Engineers designs and builds systems that capture, purify, and compress natural gas for injection into pipelines or liquefy the natural gas (LNG) for transport. ... Co-digested materials include manure; food waste (i.e., processing, distribution, and consumer-generated materials); energy crops; crop residues; fats, oils, and greases (FOG ...

Many plants designed and built by SCS produce green energy from renewable biomass fuels including wood waste, TDF, bagasse and paper-mill sludge. Much of the fuel used in these plants would otherwise go to landfills and decompose into CO₂. The top 5 reasons customers choose SCS for their energy, construction and maintenance solutions:

Indianapolis, IN -In August 2019, SCS Energy broke ground on construction of a 4,000-scfm landfill gas to renewable natural gas (RNG) plant in Indianapolis. Indy High Btu, LLC engaged SCS Energy to build the RNG plant under an engineer/procure/construct (EPC) agreement. Indy High Btu, LLC is jointly owned by Kinetrex Energy, Southside ...
