

Thanks @Steve_S for your words. So this pack with this BMS might be ok, I was hoping I could rule it out to not to be even more confused what to go for Regarding the solar, I spend most of the time close or above the Arctic Circle so solar is not the main fuel (except in the middle of the summer), hence the alternator charging and occasional shore power feed.

Seeking advice and help about BMS replacement. I have an electric scooter, an e-Max 120s, 48v, 4000w. Originally it had lead batteries but was converted to LifePo4 - it has a 16, 60A cells. The BMS board is a (see photo): HCX-PCB-D131A 120*80 24S 60A; HCX-PCB-D131C 120*80 24S 60A; I believe this a Bestech Power model.
