

Romanian Ministry of Energy has reopened a tender for battery storage for the grid integration of renewable energy, seeking "at least" 240MW and 480MWh of resources. The Ministry is aiming to get the 2-hour duration battery energy storage system (BESS) facilities up and running by mid-2026. A technical guide for selection criteria has been issued,

<Battery Energy Storage Systems> Exhibit <1> of <4> Front of the meter (FTM) Behind the meter (BTM) Source: McKinsey Energy Storage Insights Battery energy storage systems are used across the entire energy landscape. Compact and light compared with traditional alternatives, these cutting-edge energy storage systems are ideal for applications with a high energy demand and variable load profiles, accounting for both low loads and peaks. They can work standalone and synchronized, as the heart of decentralized hybrid systems with several energy inputs, like the grid, power ...

The project will be in Sremska Mitrovica, Serbia. Image: Fortis Energy. Turkey-based developer and IPP Fortis Energy has acquired a solar and battery energy storage system (BESS) project in Serbia. The company plans to begin construction at the project, in Sremska Mitrovica, west of Belgrade, in 2025.

Fortis Energy expands its portfolio. Fortis has acquired 180 MW(AC) solar project with BESS (battery energy storage system) in Sremska Mitrovica, Serbia. The 180 MWac photovoltaic solar generation asset, located in Serbia, is expected to be one of the largest solar power plant and energy storage system in the Southeast Europe.

The Serbian Government has approved the development of a spatial plan for constructing large-capacity self-balancing solar power plants paired with battery energy storage systems. This ambitious initiative will ...

In late 2015, the state-owned electricity incumbent Elektroprivreda Srbije ("EPS") announced its plan to develop a new 680 MW pumped-storage Bistrica hydro-power plant, in the vicinity of the existing Bistrica hydro-power plant (Southern Serbia). The importance and role of the Bistrica pumped-storage project would be particularly prominent on the regional energy market, in ...

With the proposed amendments to the Law on the Use of Renewable Energy Sources, Serbia will promote the introduction of energy storage facilities, Minister of Mining and Energy Dubravka ?edovi? said. Upon request from the country's transmission and distribution system operators, investors will be able to avoid delaying the connection to the ...

Slovenia: Energy prices rise for households and industries in Q3 2024; Serbia negotiates increase in gas supply with Gazprom for 2025; Romania: Oil and gas companies to keep 0.5% minimum turnover tax despite recent Fiscal Code amendment; Romania: Electricity prices surge in November 2024, trading volumes and transaction values increase

The Greek Government has launched a new support scheme targeting the installation of small-scale solar systems and battery storage in the residential and agricultural segments. Minister of Energy Kostas Skrekas announced that the program will enable households and farmers to install up to 10.8 kW of solar capacity and 10.8 kWh of battery storage. While

Kriston will be one of the speakers at the Budapest Hydrogen Summit, to be held on 10 March.. Hungarian Gas Storage is committed to the long-term introduction of modern, hydrogen-based energy storage options. In line with the National Hydrogen Strategy announced last May, the Company plans to achieve, among others, decarbonisation goals on the existing storage ...

The scope of the project includes engineering, procurement, and construction (EPC) of the solar power facility, which will also feature a 200 MW energy storage battery system. The turnkey project is scheduled for commissioning by June 2028, after which Hyundai Engineering will transfer ownership to the state-owned power utility, EPS.

Shanghai Sermatec Energy Technology Co has successfully installed a 5.1 MW/17 MWh battery energy storage system (BESS) in Bulgaria for an undisclosed client operating a solar power plant. This installation aims to ...

Investors in renewable energy sources (RES) in charge in Serbia, with new legal solutions, are imposing the obligation to have storage capacity so that their electricity production is aligned with consumption needs, but, according to the profession, the construction of reversible hydroelectric power plants would be more efficient instead.. Namely, under the ...

2. Integration with European climate goals. Although not a member of the European Union, Serbia is aligning its energy and environmental policies with the EU's ambitious European Green Deal and Fit for 55 targets, which aim to reduce carbon emissions by 55% by 2030 and achieve climate neutrality by 2050. Serbia's participation in Europe's energy market ...

As the energy sector undergoes significant changes, investors in battery storage must remain agile and ready to adapt to the challenges posed by the transition to a greener, more flexible energy system. AleaSoft Energy Forecasting's insights. AleaSoft Energy Forecasting offers insights through its AleaStorage division, specializing in the ...
