

Serbia's upcoming second renewables auction, scheduled for later this month, aims to procure 124.8 MW of solar power with a ceiling price of EUR72 (\$75.30)/MWh. This price is lower than the EUR ...

The company -- headquartered in the UK -- has secured grid connections for four solar projects in Serbia, totalling 216.5 MW. Notably, the Pirot 50 MW and Prokuplje 40 MW projects are nearing completion of urban planning processes, with expectations to secure location conditions for photovoltaic and grid connections this summer.. Local media reports confirm ...

The lowest solar bid, announced in August 2023, was EUR0.08865/kWh. Serbia has announced development of several large-scale solar projects this year, including a deal for 1 GW of solar across six sites and a 1 GW solar panel factory. Work is also underway on state utility Elektroprivreda Srbije's first solar project.

Register of Prosumers of Elektrodistribucija Srbije lists 3,199 prosumers with a total installed power of 55.2 MW. Publicly available data show that over 60 MW of solar power plants are installed in Serbia, but on the distribution system, there is still not one connected power plant, announced the RES Serbia Association on the occasion of the European Solar Day.

Minister of Mining and Energy Dubravka Djedovic and Dusan Zivkovic, General Director of the state-owned power utility EPS, have signed a contract with a consortium comprising Hyundai Engineering and UGT Renewables (UGTR) for a significant project to develop self-balancing solar power plants in Serbia.. The initiative aims to construct large ...

The Serbian Government has approved the development of a spatial plan for constructing large-capacity self-balancing solar power plants paired with battery energy storage systems. This ambitious initiative will encompass areas in the cities of Zajecar and Leskovac, as well as the municipalities of Bujanovac, Lebane, Negotin, and Odzaci.

The first phase of the construction of the biggest solar park in Serbia, Saraorci, has been completed. The total installed capacity in the first phase is 9.86 MW (11.8 MWp), whereas a power of 1.5 MW (1.86 MWp) is planned for the second phase. This is a photovoltaic power plant which is fully transferred to

Serbia's Ministry of Mining and Energy has announced a second renewable auction to procure 124.8 MW of solar at a maximum price of EUR72 (\$75.90)/MWh. Bids are due by Feb. 5, 2025.

Last April, Serbia switched on its largest utility-scale solar project, the 9.9 MW DeLasol PV project in Lapovo, central Serbia. Presently, the country is looking to introduce new renewables ...

A statement published on the Serbian government's website says solar is the most optimal solution to quickly reach large capacities from green sources, without burdening and endangering the ...

Solar energy is poised to play a vital role in Serbia's environmental and economic transition, providing households and communities with a sustainable path toward a greener future. By leveraging solar technology, individuals can reduce reliance on fossil fuels, lower energy costs, and actively contribute to cleaner air and environmental ...

The first solar park of Elektroprivreda Srbije (EPS), named "Petka", located in Kostolac, is expected to be connected to the grid within the first quarter of 2025, announced Serbia's Minister of Mining and Energy, Dubravka ?edovi? Handanovi?, during her visit to the construction site. She also highlighted that EPS's first wind farm will begin operations next ...

Israel's Nofar Energy said it has started building a 26 MW solar plant close to the Ada village in Serbia's northern municipality of Senta. "For the time being, considering that Serbia is a relatively young market, this is the single largest project for producing electricity from renewable energy sources in the country," the head of financial and legal department at Nofar ...

Serbia Solar PV Project is a 1,200MW solar PV power project. It is planned in Serbia. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It will be developed in a single phase. The project construction is likely to commence in 2024 and is expected to enter into ...

Like any other market, the solar power industry in Serbia has manufacturers, solar distributors, wholesalers, retailers, and consumers. All parties depend on each other to thrive and facilitate the production, sales, and consumption of solar energy products. Our focus is the solar distributors in Serbia, and there's much to know about them.

BELGRADE - An agreement on building self-balanced solar power plants that will ensure 1 GW of power generation capacity to Serbia was signed with a consortium between Hyundai Engineering and UGT Renewables in the Presidency of Serbia on Wednesday, at a ceremony also attended by Serbian President Aleksandar Vucic.
