

After more than 30 years of dormancy, the concept of incorporating nuclear energy into Serbia's energy mix is experiencing a significant resurgence. This renewed interest is largely driven by the new Proposal for the Law on Energy, which aims to lift the 1989 ban on constructing nuclear power plants. This movement is also backed by multiple agreements ...

The UN is promoting a diverse portfolio of innovative projects, ranging from air purification technologies to renewable energy solutions, to accelerate Serbia's green transition. These efforts have yielded tangible results, including increased renewable energy capacity by 7.9 MW, a 30 per cent reduction in primary energy consumption in public ...
