

Where can I find information about energy in Seychelles?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Seychelles on IndexMundi Homepage. Find relevant information for Seychelles on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

What is the Seychelles energy plan?

It targets an ambitious transformation and diversification of the Seychelles' currently 85 MW diesel-dominated electricity generation capacity (on Mahé, Praslin and La Digue), aiming at replacing diesel generators with domestic and international public and private financing.

Is biomass a source of electricity in Seychelles?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Seychelles: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Where can Langa solar work?

Ground-mounted solar: LANGA International works on generally degraded land: wasteland, desert areas, former quarries, former landfill sites or low-yield agricultural land. These projects can be optimised by installing tracker systems to follow the sun's cycle and maximise electricity production.

What agrivoltaics solutions is Langa international working on?

LANGA International is also working on dynamic agrivoltaics solutions: a solution based on the synergy between electricity production and the maintenance of agricultural production according to the vagaries of the weather.
