

OHAUS Corporation is a leading manufacturer of an extensive line of weighing scales, lab equipment, lab instruments, calibration weights and printers that meet the weighing, sample processing and measurement needs of various industries. An ISO 9001:2008 manufacturer, OHAUS lab balances, industrial scales, lab equipment and lab instruments are precise, ...

Used for storage of pH electrodes. pH glass electrodes need to be kept clean and moist at all times. If an electrode dries out during storage, it will require a regeneration procedure to restore the sensitive hydrated glass layer at the tip of the sensor. Proper pH electrode storage will maximise electrode performance and extend electrode life.

HI70300L is an electrode storage solution prepared with reagent grade chemicals that can be used to ensure optimum performance of your pH and ORP electrodes. Properly storing your pH electrode in a solution keeps the glass membrane well hydrated which maintains proper function and provides accurate readings.

After cleaning your electrode with one of our wide range of cleaning solutions, rinse with tap water, then soak the electrode in Hanna specially formulated Storage Solution (HI-70300 or HI-80300) before taking measurements. pH 4.01 or pH7.01 buffer solution can be used if Storage Solution is running low.

This option has the same benefit as Option 2, as the reference electrolyte and gel do not dry out. In addition, the internal reference solution and storage solution are the same so there is no diffusion potential pulling out the potassium and chlorine. The electrode is well preserved and does not have its usable lifespan reduced.

Keep your pH probes in good working order with proper storage. This pH electrode storage solution is designed specifically for the Aqua TROLL pH sensors Includes: pH Storage Solution; MSDS sheet; Be the first to review this product. Request a ...

To extend the life of your pH electrode and to be assured that it's ready to go when needed, store it in our electrode storage solution between uses. Note: Not for use with Hach IntelliCAL electrodes or stock # 37772. [Click here to request a Certificate of Analysis for your lot.](#) Please have the Lot Number and Stock Number ready.

ROSS pH Electrode Storage Solution, 1 pint (475mL) Bottle: 910001: pH Electrode Storage Solution, 1 pint (475mL) Bottle: 910060: pH Electrode Storage Solution, 5 x 2 oz. (5 x 60mL) Bottles: 9100CB: pH Electrode Storage Solution, 5 gallon (19L) Cubitainer

HI70300L is an electrode storage solution prepared with reagent grade chemicals that can be used to ensure optimum performance of your pH and ORP electrodes. Properly storing your pH electrode in a solution keeps

the glass membrane well hydrated which maintains proper function and provides accurate readings. Special formulation to minimize bacterial growth on your ...

The GroLine storage solution is specifically formulated to minimize microbial growth and to prevent any diffusion/osmotic effects from storing a probe in a solution with the highly concentrated inner reference electrolyte. Storing your pH and/or ORP electrodes in a storage solution will also keep the junction clear. Maintaining the hydrated ...

Restore proper electrode performance and prolong electrode life using Thermo Scientific Orion pH Electrode Storage Solutions in ready to use bottles. Hamburger Menu Button. ?? ?????????? ?? ?? ?? ??? GeneArt Gene Synthesis Instant Designer ...

Hanna Instruments offers a variety of Storage Solutions for many applications. Ready to use solutions, made with materials of the highest quality and consistency. ... pH Electrode Storage Solution (230 mL) \$16.99. Quick view Compare Add to Cart. pH Electrode Storage Solution (500 mL) \$24.99. Quick view Compare ...

It is necessary to store a pH electrode in a solution in order to keep the glass membrane of the pH electrode hydrated. Ideally a storage solution should be used; never store an electrode in distilled or deionized water. The Hanna Instruments storage solution is specifically formulated to minimize microbial growth and to prevent any diffusion ...

HI70300M is an electrode storage solution prepared with reagent grade chemicals that can be used to ensure optimum performance of your pH and ORP electrodes. Properly storing your pH electrode in a solution keeps the glass membrane well hydrated which maintains proper function and provides accurate readings. Special formulation to minimize bacterial growth on your ...

MA9015 is a lab grade electrode storage solution prepared with premium chemicals to improve the performance and extend the life of your pH and ORP electrodes, testers and pens. To ensure a quick response and free-flowing liquid junction, the sensing element and reference junction must not be allowed to dry out.

Principle of Working of pH Electrodes. pH electrodes work on the basis of the electrochemical Nernst Equation, which measures the concentration of hydrogen ions in a solution by a change in the potential difference to derive the pH value. Simply put, a pH electrode creates a potential difference between its interior and exterior by interacting with hydrogen ions in ...
