

US-based BESS system integrators Fluence and Powin Energy have both said they will be testing and trying out sodium-ion - among other technologies - at their respective new testing facilities. Big players, startups ...

At an investment of RMB200 million, the sodium-ion BESS reflects China's commitment to expanding its new-type energy storage capacity. The bolstered development showcases a shift towards a variety of storage ...

3 ???· At a company event last week, Hithium premiered three new products: a 6.25-MWh BESS, a sodium-ion battery for utility-scale, and a home microgrid system. The ?Power 6.25 ...

4 ???· German energy storage provider Intilion has agreed to build a stand-alone BESS of around 65 MWh for Swiss company Primeo Energie. Construction is expected to begin in spring 2025. When it is completed, it will be one of the largest BESS in Switzerland. ... Hithium unveils 6.25 MWh BESS, sodium-ion battery cell, ...

Event to mark the start of construction at the 56MW project in Strübbel. Image: Aquila Clean Energy . Update 21 November 2024: Trina Storage will also provide and integrate BESS equipment at the 56MW/112MWh project in Wetzen, in addition to the previously announced deal for the Strübbel asset, the system integrator told Energy-Storage.news today.. ...

> Sodium-ion cells are however much less energy dense, as illustrated by BYD's new product only packing 2.3MWh per 20-foot container, much less than the 5MWh and more than is now standard in the lithium-ion BESS space. Which really doesn't matter if you're on a stationary application, especially if the cost/longevity is competitive.

From sodium-ion to solid-state Along with advancements in safety, BESS will also see innovative developments in technology this year. The BESS industry has been dominated by lithium-ion batteries, but the need for more long-duration storage, which cannot currently be done economically and safely with lithium, will open the door for promising ...

Avadis Investment Foundation is buying a BESS project in Switzerland which could be the country's largest when it is scheduled to come online in 2027. UK BESS project approvals for ILI, Aukera, Apatura, Lightsource bp and data centre ... Peak Energy announces sodium-ion engineering centre in Colorado. Premium "Equal to or better than ...

Like Peak Energy, Natron sees data centres as a potential high-demand end market for Na-ion batteries. In China, the country which currently leads the world for Li-ion production as well as technology development, the first 50MW/100MWh phase of the first grid-scale sodium-ion BESS project in the world went into

operation earlier this year.

Sineng Electric's 50 MW/100 MWh sodium-ion battery energy storage system (BESS) project in China's Hubei province is the first phase of a larger plan that will eventually reach 100 MW/200 MWh. The ...

Technology provider and system integrator Wärtsilä; has been selected to provide its Quantum High Energy storage technology for a 300MWh battery energy storage system (BESS) in South Australia. The BESS will be supplied to Canadian-headquartered developer Amp Energy for the first stage of its Bungama 150MW/300MW 2-hour duration system.

In the meantime, CATL's rival BYD said that its sodium-ion batteries have made progress in reducing cost and are already on track to be on par with lithium iron phosphate battery cost next year and even 70% less in the long run. The Chinese battery maker broke ground on a 30 GWh sodium-ion battery factory earlier this year.

Infra investor Avadis launching Switzerland's largest BESS project, for 2027 energisation. November 19, 2024. ... Industry reacts to BYD's sodium-ion BESS news. Peak Energy announces sodium-ion engineering centre in Colorado. Email Newsletter. Email Address Firstname Lastname Company Job Title Company Activity ...

World's largest sodium-ion BESS starts operation ... Sodium ion batteries are cheap, recyclable, environmentally friendly, safe and are already showing impressive increases in power. CATL, the world's largest lithium cell manufacturer, has been exploring the chemistry for a decade and has had an operating line working on their manufacture ...

At an investment of RMB200 million, the sodium-ion BESS reflects China's commitment to expanding its new-type energy storage capacity. The bolstered development showcases a shift towards a variety of storage technologies, as sodium-ion batteries begin to complement the dominant Lithium-ion market.

The average cost for sodium-ion cells in 2024 is \$87 per kilowatt-hour (kWh), marginally cheaper than lithium-ion cells at \$89/kWh. Assuming a similar capex cost to Li-ion-based battery energy storage systems (BESS) at \$300/kWh, sodium-ion batteries' 57% improvement rate will see them increasingly more affordable than Li-ion cells, reaching ...
