You can find the fill factor of a solar cell using an IV curve. Fill factor can be defined using the equation: Where P max is the maximum power output, J SC is the short circuit current density and V OC is the open circuit voltage. Fill factor is often referred to as a representation of the squareness of the IV curve.

1 ??&#0183; The introduction of ALMM-II for domestic cells may result in an increase in the delivered cost of domestic modules by 6-7 cents/Wp, leading to a rise in solar tariffs by 40-50 paise per unit for the short run till local cell supply scales up, stated a report by rating agency CareEdge Ratings.
